

Tuesday, March 17, 2020

Dear Students of Math 3TP3:

The university community takes the health and wellness of our members seriously and we are interested in slowing the potential for spread of COVID-19. We are committed to ensuring the successful completion of the current academic term by all of our students. While the University has taken many measures to prepare and keep our community informed as the pandemic has unfolded, the university has made a decision to suspend classes at McMaster.

McMaster in-person classes and tests for undergraduate and graduate students will end as of Friday March 13th and no in-person exams will be held at the end of this term.

The following describes what you can expect for Math 3TP3 between now and the end of the term:

Between now and April 7, you can expect the following changes with respect to course instruction for this course:

- the remaining lecture material will be posted on the course website along with additional material and audio files.
- I will hold office hours via skype or facetime by appointment; please send email in order to schedule a meeting time.

In addition, you can expect the following changes to the assessments used for this course:

- You will continue to be responsible for the final assignment and group project; the group project will no longer have a presentation component and only a written report.
- Once these last pieces of term work are marked, your grade will be calculated and forwarded to you. You will be allowed to take this as your final grade or to do one additional, take-home assignment in place of the in-person exam. This last assignment will be done during the exam period and will be due by Apr. 25.

If you have a need for accommodations, please continue to communicate with Student Accessibility Services and keep me informed.

In the event significant changes to the COVID-19 situation, further changes may need to be made to this course. Please visit <https://covid19.mcmaster.ca/> for up-to-date university information.

Sincerely,

Bradd Hart
Instructor, Math 3TP3

Matheus Grasselli
Chair, Department of Mathematics & Statistics
